

Client	Clarus Peptides
Report Date	06/02/2026
Accession Number	6654106-2026
Batch Number	1701
CAS	See notes
Molecular Formula	See notes
Appearance	White Lyophilized Powder
Molecular weight	Blend
Column	C11, 4.5 × 150 mm, 5 µm
Conformity	Pass
MS Detector	UV (220 nm)
Detector	ESI-MS

Results

Product	CJC-1295 Ipamorelin Blend
Purity	Blend > 99%
Identity	Confirmed via LC-MS
Net Peptide Content	10.14mg
Endotoxins	<0.05 EU/mL (Pass)

Analytical testing was performed via high-performance liquid chromatography (HPLC) with UV detection, coupled to mass spectrometric analysis.

HPLC Chromatogram

Peptide purity analysis was performed using LC-MS/MS under standard laboratory conditions. The results are specific to the sample(s) submitted and are provided for research and informational purposes only. All materials tested are intended strictly for research use and are not approved for human or veterinary use, including diagnostic, therapeutic, or clinical applications. Results should be interpreted by qualified professionals. Analytical outcomes may be influenced by sample integrity, handling, and other experimental variables.
